

## Outwood Primary Academy

Hello parents and carers, this half term your child will be learning about...

Y3

Earthquakes

Earthquake Proof Buildings

Forces & Magnets

Perspective

Celebrations

Christianity

Glocksenspiel

Invasion Games & Gymnastics

### Project Idea

Thank you so much for your support in creating some amazing homework projects last half term! In year 3, this half term our topic is 'Earthquakes' in which we will be investigating natural disasters and rescue missions. Please feel free to be as creative as you wish with your ideas for your homework project... we have included some ideas below to help you. The projects can be brought in at any point through this half term but by the 16<sup>th</sup> December...

#### Here are a few ideas to inspire you with your project...

- DT – build a model to show the Earth's surface and how earthquakes begin or design an earthquake proof building or shelter. Build your own volcano using a range of materials.
- Art and Design – create a poster or billboard to promote a charity or rescue service who launch rescue missions
- Art – produce a canvas picture of a volcanic eruption
- History – Write a report about a famous earthquake or volcanic eruption – what happened and the impact afterwards
- Geography – Research a place or country that is at risk of earthquakes or has had earthquakes before
- ICT project – make a power point presentation on earthquakes
- PSHCE – Research the emergency services and charities who help people who have experienced an earthquake
- English – Produce a newspaper report on a real life earthquake that has actually happened
- Maths and Science – investigate information that has been recorded on earthquakes using the Richter scale

Follow our class page to find out about the exciting work we're doing this year @
